Van Buren

Craftsmanship Since 1861

Van Buren Bolsward is the only sheepskin tannery in the Netherlands. We have been doing this since 1861! With an eye for quality, animals and the environment, we produce sheepskins of the highest class.

Based in our historic building in Bolsward, we continuously innovate with new colours, products, and sustainable solutions. With over 160 years of experience, we are a unique family business known for quality and reliability.

Tanning sheepskins is a traditional craft we've practiced for generations, mostly by hand. This preserves the natural characteristics of the wool. Every step is carried out with respect for both materials and the environment.

Each sheepskin is hand-selected – only the very best make the cut. We repurpose residual materials into new products, and our long-lasting skins fit perfectly within the slow furniture philosophy.

SHEEPSKINS

Maintenance instructions sheepskins

Regular care

- Regular comb the wool to maintain a nice, soft appearance.
- Small dirt can be blotted with a damp cloth, try to keep the leather side as dry as possible.
- It's possible to let the sheepskin air outside.
- If necessary, you can vacuum the sheepskin on low power.

We do not recommend washing the sheepskin! The leather side may stiffen when it has been wet. If however you still want to wash the sheepskin, use the following instructions:

- If you have a steamer, only steam with foam for wool cleaning.
- Hand wash only in cold water, possibly with a little amount of a mild liquid detergent.
- Shake and wring the sheepskin to remove the excess water.
- Let the sheepskin dry at room temperature and stretch the sheepskin often during drying to remain the flexibility of the leather.
- Do not use a tumble dryer, sunlight or any other direct heat source!

Dyed sheepskins

These can only be treated with dry cleaning methods to prevent colour fading or colour release. Try to avoid direct sunlight as well. Brushing and vacuuming are great solutions

COWHIDES

Maintenance instructions cowhides

Regular care

Cowhides don't have to be combed. Use a vacuum cleaner on the lowest power or a broom, both in the direction of the hair. Avoid putting pressure on the skin. This will prevent hair loss.

Remove dirt and stains

Dab as soon as possible with a clean damp cloth, do not put hard pressure. Dried dirt is best removed by brushing the hair with a slightly damp cloth. To remove stubborn stains, you can use a little natural detergent like green soap. Always be careful not to wet the leather side of the cowhide, to prevent it from getting stiff. In case the leather did get wet, never dry in direct heat such as sunlight.

Dehydration

To prevent dehydration and hair loss, once in a while slightly sprinkle the hair with a mist spray of a water sprayer. In case of underfloor heating, moisturise the skin more often.

Imprints

Place a bag of ice cubes on the imprint. After the ice cubes have melted, brush with a soft brush in the direction of the hair. Another possibility is to use a damp cloth and rub it several times in the direction of the hair.

WARMTH & COMFORT

Durable

We try to be as durable as possible. To lower the amount of waste, we convert the sheepskins that do not pass our quality control, due to bald spots, ruptures, or other imperfections, into charming products that offer warmth and comfort.

Sheep wool is naturally self-cleaning and antibacterial. It has the natural property to prevent sweating and neutralise bad odours. The fat in the wool (lanolin) absorbs moisture and releases it in the air due to friction and heat. When the moisture is released from the lanolin, it creates a soap like substance. The substance kills all bacteria and therefore it does not have any odour.

It also self-regulates the temperature due to the air between the hairs, working as an insulator. Delightful warm during cold winter days and pleasingly cool in the summer. Comfort for every season!

Gloves & mittens

Our gloves & mittens are made of lambskin, which is extra soft and flexible with still all the benefits of sheepskin. Besides that sheepskin keeps your hands nice and warm, it also ventilates. So your hands stay nice and warm, without sweating! You don't need to wash them, but If you want, you can give them extra protection with our water-repellent spray.

House shoes

Our house shoes and slippers are manufactured in our own atelier with the highest possible quality in mind. Through the use of hard soles, they hardly wear out and can be worn both in- and outside. They offer lots of warmth and comfort!

Bicycle saddle, car seat & steering wheel covers

The covers are, due to the use of elastic, universal in size and suitable for almost every seat and steering wheel. No more sweating or freezing on a bicycle or car seat and no hot or cold steering wheel. Pleasant warmth & comfort all year round

"These slippers are handcrafted from 100% natural sheep wool in Nepal. Wool is naturally breathable, temperature regulating and antibacterial. Perfect all year round!

Experienced craftsmen produce these under fair conditions. With these slippers you not only add quality and comfort to your range, but you also contribute to sustainable employment and social impact."
